Position: Backend Software Developer

We are looking for a Backend Software Developer to join our growing engineering team. The ideal candidate should have strong experience in building scalable backend systems using Python and RESTful APIs. Experience with cloud platforms (AWS preferred), SQL and NoSQL databases, and containerization tools such as Docker is a plus.

Responsibilities:

- Design, develop, and maintain backend services and APIs

- Collaborate with frontend developers and product managers

- Optimize system performance and reliability

- Write clean, well-documented code and unit tests

Qualifications:

- 2+ years of experience in Python development

- Strong understanding of REST API design

- Familiarity with AWS, Docker, Git, and CI/CD pipelines

- Experience with SQL (e.g., PostgreSQL) and/or MongoDB
